

Roshan Hari Bachhav

Full-Stack Web Developer | MERN Stack | PHP Laravel
bachhavroshan600@gmail.com • 7709638776 • Nashik, Maharashtra
github.com/roshanbachhav • linkedin.com/in/roshan-bachhav

PROFESSIONAL SUMMARY

Full-Stack Developer with 1+ year of professional experience shipping production-ready applications using the MERN stack and PHP (Laravel, CodeIgniter). Delivered 3 major MERN projects live in production — including HappyWedz, a multi-vendor platform with thousands of real interactions — plus 5+ smaller builds covering CMS integration, JWT authentication, Redux state management, and cPanel hosting. Comfortable across the full delivery lifecycle: requirement to code to deployment.

PROFESSIONAL EXPERIENCE

Full-Stack Developer — Anantkamal Tech Labs, Nashik

Jun 2024 – Present

Product studio specialising in SaaS tools and client web platforms. Contributed across 4 live projects as part of a small dev team.

DeckCraft — Online Presentation Platform · MERN · TanStack Query · Tailwind CSS

Live: <https://deckcraft.anantkamalsoftwarelabs.com/>

- Built the platform end-to-end: live HTML/CSS/JS code editor inside each slide with instant browser preview — no third-party slideshow library.
- Engineered a full presentation player with auto-play, keyboard navigation, and slide controls from scratch.
- Added one-click share via link and WhatsApp so developers can distribute demos instantly.
- Owned full stack — React + Tailwind (frontend) and Node.js + Express + MongoDB (backend) — through to deployment.

HappyWedz — Large-Scale Wedding Platform · PERN + MERN · AWS S3 · Socket.IO · JWT · RBAC

Live: <https://happywedz.com/>

- Contributed to a live multi-vendor platform covering vendor listings, venue galleries, live photo uploads, and an eCommerce module.
- Built User, Vendor, and Admin dashboards in React.js with three-layer RBAC — single codebase, separate permission scopes.
- Wrote backend services in Node.js + Express with PostgreSQL; secured all endpoints with JWT and refresh token rotation.
- Integrated AWS S3 for all media with server-side validation before storage; added real-time updates via Socket.IO.
- Separately built the HappyWedz eCommerce module (MERN): auth flow, product CRUD, cart, and S3 image pipeline.

Dreams To Fly — Education & Visa Consultancy · Frontend · Tailwind CSS · UI/UX

Live: <https://dreamstofly.com/>

- Developed 21+ service pages (overseas education, visa, forex, internships) — fully responsive across all breakpoints.
- Translated design mockups into clean, maintainable Tailwind CSS layouts with consistent spacing and typography.

Elite PIC — Immigration Information Platform · MERN · CMS Integration

Live: <https://elite-pic.vercel.app/>

- Built CMS-driven country and visa category pages — content editors update data, frontend reflects changes without redeployment.
- Focused on component reuse, optimised API calls, and deployed cleanly on VPS.

Urban Gate - Multi-Tenant SaaS ERP for Housing Societies

Stack: Laravel, PostgreSQL, React 19, TypeScript, Tailwind CSS, Vite

- Developing a production-grade multi-tenant SaaS platform serving housing societies and gated communities with separate database instances per tenant
- Built RESTful APIs using Laravel with Sanctum authentication for secure token-based access control across Super Admin console and society modules
- Implemented role-based access control (RBAC) managing Super Admins, Society Admins, Residents, Guards, and Vendors with granular permissions
- Developed frontend using React 19 with TypeScript, React Router, and Tailwind CSS following component-based architecture patterns
- Created comprehensive modules: society management, gate access control, marketplace for vendors/products, document storage, support ticketing system
- Implemented security features including audit logs, session management, API rate limiting, and comprehensive system activity tracking

PROJECTS

RV GameStore — Spring Boot, MySQL, Thymeleaf, Tailwind, AJAX

Feb 2024 – Mar 2024

github.com/roshanbachhav/Gamestore-Webapp

- Full-stack game store with user/admin role system, dynamic catalogue browsing, Hibernate ORM, and AJAX-based cart.

Streamify — React.js, Firebase, Redux, TMDB API, Material UI

Sep 2024

github.com/roshanbachhav/Streamify

- Movie discovery app with Firebase Auth, TMDB API-powered recommendations, Redux state management, and real-time user data sync.

TECHNICAL SKILLS

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Redux Toolkit, TanStack Query

Backend: Node.js, Express.js, PHP (Laravel, CodeIgniter 4), Java (Spring Boot), Firebase

Databases: MongoDB, PostgreSQL (MVCC), MySQL

Auth & Security: JWT, Refresh Tokens, Google OAuth, Role-Based Access Control (RBAC)

Real-Time: Socket.IO, Redis (caching)

Cloud & Deploy: AWS S3, cPanel Hosting, Vercel

Tools: Git, GitHub, REST APIs, Postman

Architecture: MVC, SPA, SaaS, MVCC

EDUCATION

MCA — Master of Computer Applications

Aug 2024 – Pursuing

Sandip University, Nashik | Current Grade: A

BSc Computer Science

Jul 2021 – Mar 2024

KR. V. N. Naik Science & Engineering College, Nashik | 87%
